

Greetings from

***Department of
Spine and Joint Surgery, BMJH***

With the development of spine surgery as a distinct and growing sub specialty of orthopedics, it is increasingly imperative for postgraduates to have a thorough knowledge of spinal disorders and their management. We are introducing a program specifically tailored for Orthopaedic PGs and Spine fellows. The focus is on enhancing knowledge in diverse spine disorders. This comprehensive initiative aims to deepen understanding through immersive case studies and enabling participants to make decisions in their daily practice. Furthermore, the program offers practical experience by providing hands-on training with saw bone models and opportunities to assist in complex Spine surgeries and improve surgical proficiency.

Best Regards

Dr BH Mahesh
Head of Department

Under the aegis of

MASTER CLASS SPINE

A TEACHING PROGRAM FOR ORTHOPAEDIC POST-GRADUATES
AND SPINE FELLOWS
