Dear friends,

Surgical approaches are an essential component of an Orthopedic surgery. “How to get myself right the first time” is what every Orthopedic resident/surgeon aims at, and this is possible by proper preparation or training. With a busy operating schedule, it may not be possible to teach a resident about all the finer details of the surgical pearls and pitfalls. This course is aimed to fill this lacuna with a host a specialists in the field in a relaxed setting.
